# PROJECT OVERVIEW

## Introduction

Tempus Grabbit is the perfect time management application that will help you keep track of your projects and manage them efficiently.

## Features

### Dashboard

A great way to view and manage your projects and tasks, the dashboard will serve as the welcome page when a user logs in. With a list of upcoming due dates, they'll never miss a deadline.

### Project Page

Manage your projects with ease with the project page. Create and edit your projects as well as see what's due when with the easy to view calendar.

### Task Page

Managing tasks has never been such a cinch. Once you start a project you can create tasks and manage them with the task page. And the color coding feature will only make organization that much easier!

### Target Audience

Tempus Grabbit is designed for anyone who wants help with managing their time and projects efficiently but doesn't want to pay an arm and leg for that help. This application is perfect for students and professionals alike.

### The Future of this Application:

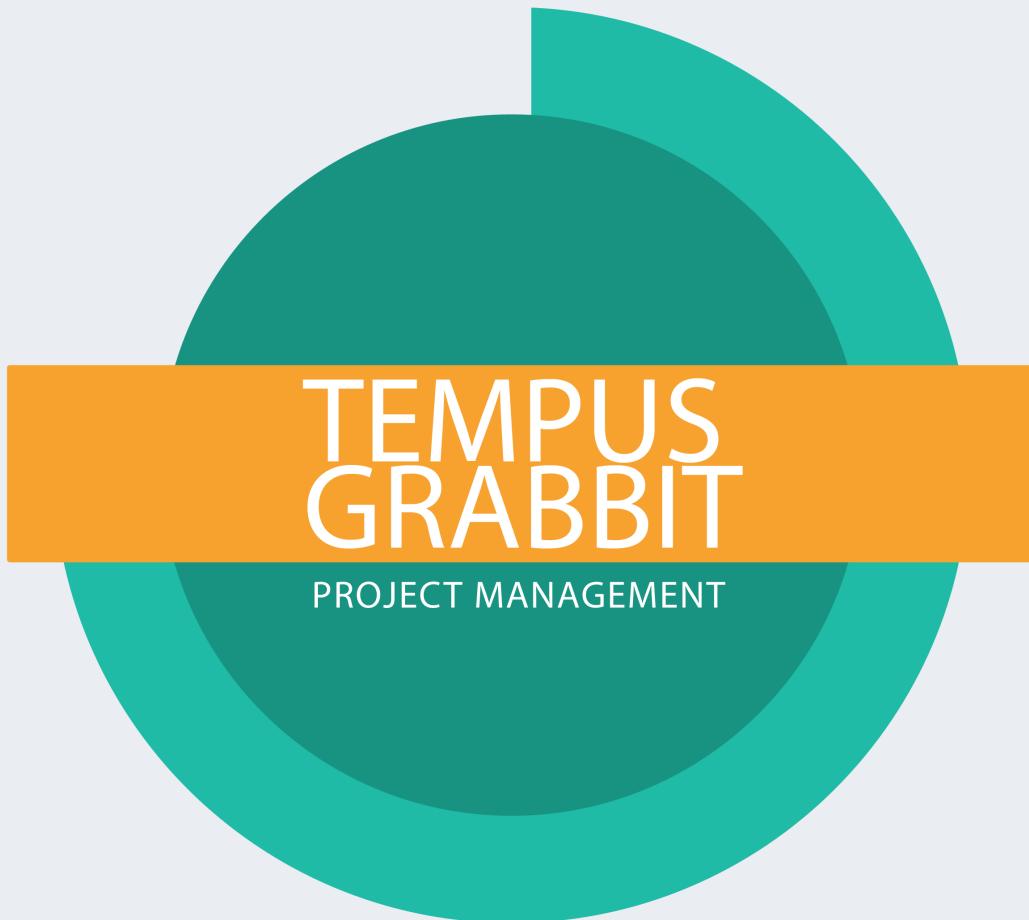

In the future the user will be able to share their tasks with classmates or co-workers with no problem at all. Have a smartphone? Perfect! This application will be easy to access no matter where you are!
